

MINIMALLY INVASIVE OPTIONS

By
DR. GARY GOLDENBERG
MOUNT SINAI HOSPITAL
NEW YORK, NEW YORK

Drawing on a holistic approach to skin care, Dr. Gary Goldenberg strives to take care of the whole patient, not just one particular area of concern. “My approach is personal because I really want to learn about the patient as a complete person,” he says. Each individual’s lifestyles and habits will affect their treatment plan, so the more I know, the better care I can provide.” Dr. Goldenberg also educates patients on less-invasive treatment options. “It is important for patients to understand what can be achieved with the nonsurgical, minimally invasive techniques that I use,” says the doctor. “I deliver a natural look that keeps patients looking like themselves, but with the clock turned back 10 or 15 years.”
