# LOOK YOUR MOST

## Kate Walsh

Want Kate's wide-eyed look? Winging eyeliner out at the edges instantly lifts and enhances eyes!

Our experts answer your most p

**Q** Eyeliner pencils always smudge, making my eyes look tired. Is there a better way to define my eyes?

**A** For budgetproof wear, switch to a gel liner! The creamy consistency goes on smoother than pencil and stays put once it dries. Dip an eyeliner brush into the gel, then press the brush into the lash line, applying in short strokes as you work your way

out. To make eyes appear bigger and brighter, apply to the top lid only — liner on the bottom can make eyes look droopy.

### Expert Tip:

For easier application, gently lift your lid. This will allow you to get closer to the lash line!

**Q** Lately, my legs feel stubbly even after I shave. How can I get a closer shave?

**A** For starters, shave about 10 minutes into a hot shower or bath, because heat opens up hair follicles, allowing for a closer shave, says NYC-based dermatologist Dr. Gary Goldenberg. Lather up with shaving gel, which helps the razor glide over skin. And make sure your razor is sharp. A dull razor drags hair before cutting it, causing bumps and irritation. When done, apply a cold towel onto shaven areas to close hair follicles, keeping skin soft and smooth!

**Q** My skin is so sensitive, and although I use unscented moisturizer, I still tend to get irritated. What should I do?

**A** "Surprisingly, unscented products contain fragrances!" says Dr. Goldenberg. The scent is masked by chemicals but can still cause flare-ups. Instead, look for moisturizers labeled "fragrance-free," which are entirely free of scents and fragrances. This should stop irritation immediately.
