Fashion Flash Cover Star: Dr Gary Goldenberg

I was so excited to see Dr Gary Goldenberg of Mount Sinai Medical Center on the cover of **The Dermatologist**. Dr Goldenberg has been endlessly generous with his time and knowledge of a wide range of skin care issues. He has been my resource for the No-Nonsense series on acne, as well as posts on acne scars, skin changes in menopause, and botox vs fautox, just to name a few. He is a superb physician and everyone who has seen him personally have actually thanked me for the recommendation. He is equally skilled in both cosmetic and medical dermatology and one of the few doctors I trust with my own skin. He also has an integrity that is rare these days and you can trust his advice.

Currently we are working together on an intriguing mix of topics including, the hows and whys of Korean skin care, what can be used safely to treat acne during pregnancy, new treatments for melanoma, psoriasis and eczema and the best way to regrow eyerows. If you have specific skin care questions, email them to me and I will ask Dr Goldenberg for the answers.
