# Julia THE SECRET AFFAIR That Nearly Destroyed Her

- Daily phone calls & secret meetings at an apartment
- How she recovered by turning to her children & charity work

# KNIFESTYLES OF THE RICH & FAMOUS

**W**hen country music star Shania Twain popped up as a guest mentor on *The Voice* in April, fans were quick to react to her updated appearance. One viewer tweeted, “Holy Botox, what happened to Shania Twain?” The experts consulted for this story (none of whom have treated Shania) say that while the star, now 51, has put on some weight, they also suspect the five-time Grammy winner has had some work done. “It looks like Shania has combined Botox, fillers and laser treatments to help tighten the face and add volume,”

**“She looks more youthful than her actual age.”**

— Dr. John Layke

says Beverly Hills plastic surgeon Dr. John Layke. NYC dermatologist Dr. Gary Goldenberg feels she looks “appropriate for her age” but believes she’s had done some contouring with fillers. Dr. Payman Danielpour, another Beverly Hills plastic surgeon, adds that Shania’s face, “although youthful, is slightly too full.” But cosmetic surgeon Dr. Alexander Rivkin can’t find any room for criticism. “She’s doing a fabulous job of looking natural,” he says. “I wouldn’t change a thing!” **LS**

# Shania's Still Got It

NOW

## FOREHEAD

Dr. Goldenberg points out how smooth Shania's forehead is. “She’s likely been getting Botox for some time since there are no wrinkles or lines,” he says. Cost: \$900 to \$1.2K per treatment.

## EYES

“Her eyes appear to have a youthful cant,” says Dr. Danielpour, referring to their angled tilt. This “exotic” look can come from eyelid surgery (\$6K to \$12K) or fillers (\$1K).

## CHEEKS

“It looks like her cheeks have been plumped up with a filler,” says plastic surgeon Dr. Anthony Youn, though weight gain could also play a role. He suspects Sculptra, at a cost of \$2K.

## SKIN

Shania's impeccable skin quality is what Dr. Rivkin considers “most striking” about her look. He thinks she’s getting a laser treatment such as Fraxel, which costs \$1.2K per session.
